Game is pretty fun to play. It's basically COD Zombies in VR. One of the best graphics in a VR game. Graphics would compare to Red Matter or Contagion VR. These games have the best and most realistic graphics quality in VR. No lag issues on 1060 6 GB, i7 6700k. Shotgun mode is the most fun for me. Gun mechanics are very smooth and life like. I love the fact that you can buy AI to help you.. Decent range of enemies. Overall, well recommended for the sale price.. Nice graphics. Gameplay seems solid-no bugs encountered (yet). Enemy spawning could be expanded into several different ways. Maps are pretty large, especially Old Village. Subway map would be even more engaging if the train moved and went around.
